April–May	GitHub polish READMEs + screenshots Demo videos	Company-specific prep Maintain 120+	120+ problems	Keep interviewing Exam prep starts
June (Goal)	—	Maintain	■ Secure Internship	SEM 4 END EXAMS Final CGPA push

GitHub Strategy

- Push code every day (small commits OK)
- Pin your 2 best projects
- Write proper README for each project
- Green graph matters to recruiters
- Target: Active from Day 1

LinkedIn Strategy

- Headline: "CS Student at SPIT | MERN Dev | DSA"
- Post weekly — projects, progress, learnings
 - Connect with 5 people weekly
 - Cold DM startups from March onwards
 - Target: 300+ connections by June

DSA Philosophy

- 120 problems done deeply > 200 rushed
- Focus: Arrays, Hashmaps, Two Pointers, Linked Lists, Recursion, Basic Trees
- Graphs + DP saved for 3rd year
- 3-4 problems/week is enough
- Quality over quantity always
